

CUUMULO AI

STOP CHOOSING BETWEEN CAPABILITY AND CONTROL. GET BOTH.

The Problem:

Your organization needs AI — but every public tool on the market comes with a hidden cost: **Your Data**. ChatGPT, Gemini, and Copilot process your prompts on infrastructure you don't control and your sensitive information flows through third-party servers. In some cases, it's used to train the very models your competitors also use. For regulated industries, this isn't just risky — it's unacceptable.

Meanwhile, your employees are already using these tools — creating a Shadow AI crisis you can't monitor, audit, or secure.

The Solution: Cuumulo AI

Cuumulo gives your organization enterprise-grade AI that never compromises on privacy — all hosted on the KLR VPC, a secure, sovereign infrastructure built for businesses that treat data protection as a requirement, not a feature.

Start with Cuumulo AI Core — a fully self-contained AI solution powered by Google's Gemma 3 running on KLR VPC. The LLM processing of your data stays within South African borders. All your company data stays inside your private instance on KLR VPC. No external API calls. No data leakage. No model training risk. Fully data resident. Predictable per-user pricing with no per-token surprises. Your data stays private and isolated to you and the data processing stays resident on KLR VPC Solutions in South Africa.

Scale to Cuumulo AI Pro — when you need more power. Cuumulo AI Pro includes all Core features plus access to 11+ frontier models from OpenAI, Anthropic, Google and Grok through a single, secure platform. Generate videos with Veo 3.0. Tackle complex reasoning with DeepSeek Reasoner. Draft nuanced documents with Claude Opus 4. Your company data still never leaves KLR VPC

What Makes Us Different:

Privacy by Architecture

Not by policy. Your data physically stays in KLR VPC.

Best Model for Every Task

One platform, multiple models, every capability.

Consolidated AI Spend

Replace 4+ vendor subscriptions with one bill.

Regulatory Compliance Built In

POPIA-ready, audit-logged, role-based access.

Fast Time-to-Value

Turnkey deployment, dedicated support, 1-hour onboarding.

Private Knowledge Base

Upload and interact with private company data.

"Every leading AI model. One secure platform. Your data stays yours."

Your competitors are adopting AI. Your employees are already using it — with or without your permission. Cuumulo lets you embrace the AI revolution on your terms: with full control, full compliance, and full capability.
