

# CUUMULO AI

Enterprise AI. Zero Compromise on Privacy.

KLR PRIVATE VIRTUAL CLOUD (KLR VPC)

# CUUMULO AI

Enterprise AI. Zero Compromise on Privacy.

## What is Cuumulo?

Cuumulo is a secure, enterprise-grade AI platform built on the KLR VPC — designed for organizations that demand next-generation AI capabilities without ever risking data exposure. Available in two powerful packages, Cuumulo puts you in complete control.

## CUUMULO AI CORE

**Private. Secure. Self-Contained. Data Resident.**

Powered by **Google's Gemma 3** open-source LLM, Cuumulo AI Core runs entirely within the KLR VPC. Nothing leaves. Nothing is shared. Nothing is used to train external models.

Model	Google Gemma 3 — advanced reasoning, summarization & generation
Hosting	100% on KLR VPC — zero external API calls
Data Residency	All prompts, processing & outputs stay within KLR VPC
Privacy	Zero data leakage — never used for model training
Compliance	Built for regulated industries (POPIA and beyond)
Deployment	Turnkey setup with dedicated environment
Performance	Low-latency, high-throughput optimized inference
Customization	Fine-tune Gemma 3 on your proprietary data
Access Control	Role-based access, audit logging & admin controls
Pricing	Predictable per-user subscription — no per-token fees
Knowledge Base	Upload your company data into the Cuumulo Knowledge Base to interact with your data privately

## CUUMULO AI PRO

**EveryLeadingAI Model. One Secure Platform.**

Everything in Core **plus** access to **10+ frontier AI models** spanning text, reasoning, audio, and video — including models from OpenAI, Anthropic, Google and DeepSeek.

Multi-Model Access	GPT-5, Claude Opus 4, DeepSeek Reasoner, Veo 3.0 & more
Multimodal Power	Text, video generation, audio processing & voice conversations
Privacy Architecture	Company data stays in KLR VPC; third-party prompts handled under strict protocols — never used for retraining
Unified Interface	Single platform, single login — no juggling vendor subscriptions
Audit & Control	Role-based permissions, usage tracking & full audit trails
Scalability	GPU-powered elastic scalability
Onboarding	1 hour free AI consulting + optional add-on services
Support	Priority KLR support
Knowledge Base	Upload your company data into the Cuumulo Knowledge Base to interact with your data privately

## Why Cuumulo?

-  **Total Data Sovereignty**  
Your IP and sensitive data never leaves your environment
-  **No Model Training Risk**  
Unlike ChatGPT or Gemini, your inputs are never used to train external models
-  **Regulatory Confidence**  
Meet the most stringent compliance frameworks
-  **Reduced Shadow AI Risk**  
Give employees approved, powerful tools so they stop using unauthorized ones
-  **Future-Proof**  
Start with Core, upgrade to Pro anytime. New models integrated as they emerge
